

Transform your data and analytics estate from chaos to competitive advantage

The cloud holds immense promise to transform business. However, taking full advantage requires an efficient data management strategy that allows your organization to focus on innovation rather than getting mired in data management complexity.

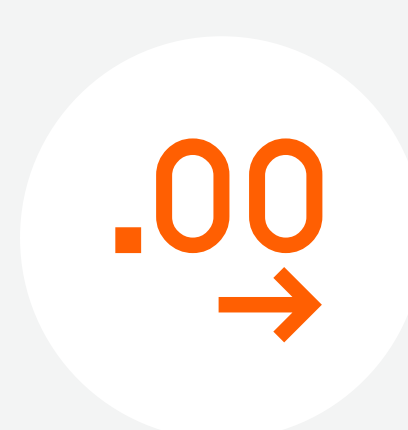

15-40%

Average reduction in infrastructure costs companies can generate by migrating to the cloud.¹

Modernize your data and analytics estate

By using a lake-centric, cloud-native approach, Teradata and AWS can help you clean up the data spread throughout your enterprise—all while minimizing management time and costs. The result? You get back to doing what you do best: creating innovation and driving your business forward.

How we help:

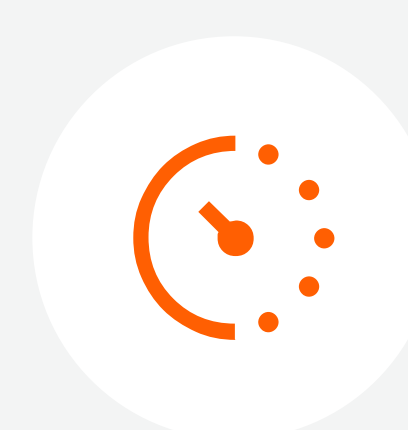

Control costs like never before

By combining the analytic power of the Teradata VantageCloud data platform with the flexibility, scalability, and security of AWS, you can get faster access, better governance, and more powerful analytics at massive scale—all at a lower total cost of ownership.

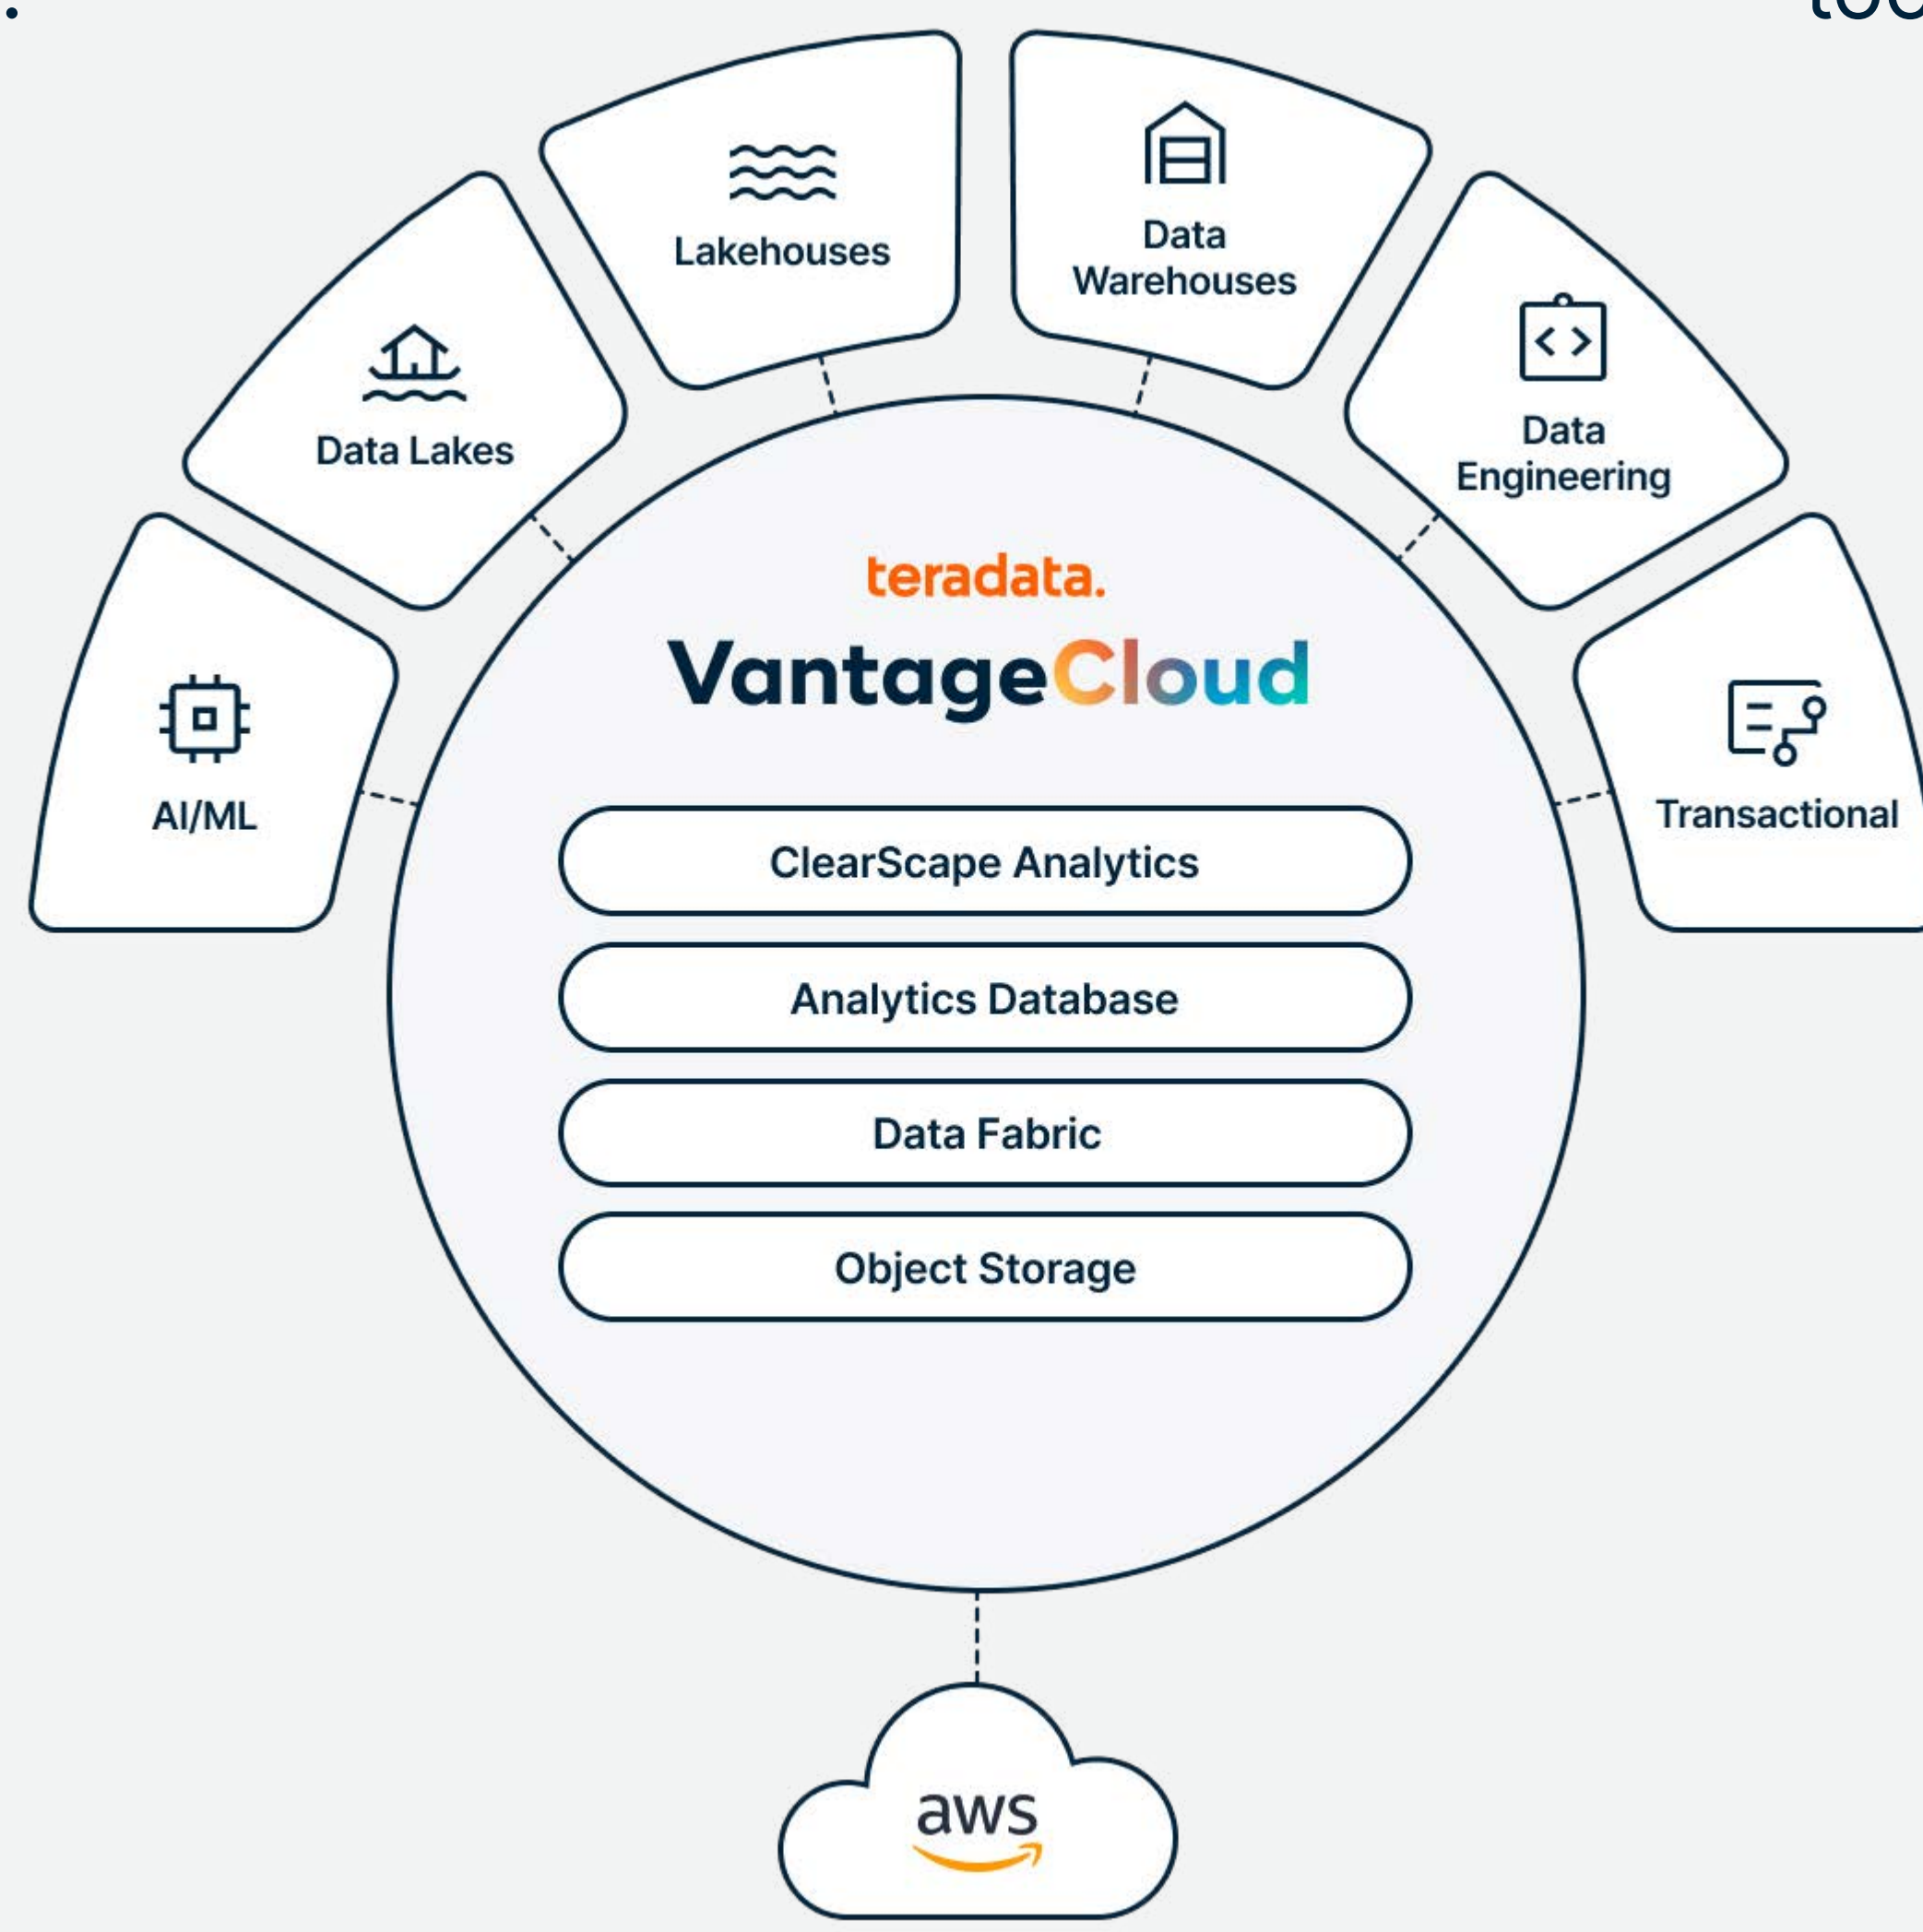

Eliminate your data and compute mess

A lake-centric approach addresses the expensive and inefficient processes caused by ungoverned data proliferation, resulting in lower costs, greater agility, and analytics innovation.

Modernize on your terms

As you consolidate workloads, you can control the pace of modernization, choose which legacy platforms to modernize or retire, and redesign data feeds and workflows so that they take advantage of AWS cloud-native tools and services.

Teradata and AWS: A winning combination

That's just the beginning. With the option to separate compute from storage, cost-effective scaling, and integrations with more than 20 AWS services, Teradata and AWS offer great advantages together, such as:

Making you enterprise-ready

Offering price predictability

Delivering optimized scalability

Providing a comprehensive, end-to-end analytics platform

Migrate and modernize your data and analytics estate with Teradata and AWS

Discover how modernizing your data and analytics estate can help your organization eliminate data complexity and accelerate time to value while giving you full control over costs.
